SUBJECT INDEX

All papers are indexed once in **bold face** type by the first important word in the title. Cross-indexing of papers has been indicated in regular type. Papers have been cross-indexed according to important components of the title.

A

Abdominal, see thoraco-abdominal pressure
Adults, see normal adults
Advances, recent , in the functional anatomy of the upper limb. John V. Basmajian, 165
Aerosols, see electro-aerosols
Air ions, see ions
Ambulation, see walking sticks
Amplifier for Electromyographic Signals. Raymond L. Ball, 116
Analysis, see electromyographic analysis
Anatomy, see functional anatomy
Applied forces, see forces
Automatic toothbrush, effectiveness of the , for handicapped persons. Robert Aronovitz, and Charles W. Conroy, 193

B

Bands, see I bands
Basis pontis, recovery of motor function after unilateral infarction of the , . Report of a case. Mary Jane Aguilar, 279
Book Notices, 38, 85, 264

C

Canes, see walking sticks
Case report. Recovery of motor function after unilateral infarction of the basis pontis. Mary Jane Aguilar, 279
Cervical spondylosis, repetitive trauma in the genesis of , . D. R. Rellan, A. Bhatacharya, A. N. Mehrotra, N. C. Gupta, and P. C. Dhanda, 259
Characteristics of Head Motion with Variable Visual Feedback Delay, Velocity and Displacement. Karl U. Smith, and Durgo S. V. Ramana, 289
Conduction, see sensory conduction
Congress, see fifth international congress
Connections, evidence for , of the sarcoplasmic reticulum with the sarcolemma and with the Z line in skeletal muscle fibers of fetal and newborn rats. Sheppard M. Walker, G. Randolph Schrodt, and Maxine Bingham, 63

D

Delay, see feedback
Designs, see electronic designs
Detailed guide to wheelchair prescription, see wheelchair
Digital display, see instantaneous visual digital display
Digital nerve fibers, sensory conduction of , . Osvaldo E. Miglietta, 78
Disabled men, a survey of the time, magnitude and orientation of forces applied to walking sticks by , . M. P. Murray, A. H. Seireg, and R. C. Scholz, 1
Disabled, see handicapped
Displacement, see feedback
Display, see instantaneous visual digital display
Distribution, filament lengths and , of staining material in the I bands of rat skeletal muscle. Sheppard M. Walker, and G. Randolph Schrodt, 178

E

Effectiveness of the Automatic Toothbrush for Handicapped Persons. Robert Aronovitz, and Charles W. Conroy, 193
Effect of Quadriplegia and Hemidiaphragmatic Paralysis on Thoraco-Abdominal Pressure during Respiration. Harold Keltz, Saul Kaplan, and Daniel J. Stone, 109
Electro-Aerosols, Air Ions and Physical Medicine. Special Review. Alfred P. Wehner, 119
Electromyographic Analysis of a Rapid

Volitional Movement. Mario Wiesendanger, Peter Schneider, and Jean-Pierre Villoz, 17
Electromyographic signals, amplifier for , . Raymond L. Ball, 116
Electromyographic study, pre-orthotic training. An , in normal adults. T. G. Simard, and H. W. Ladd, 301
Electromyography, see digital nerve fibers
Electronic Designs, 14, 116
Amplifier for electromyographic signals. Raymond L. Ball, 116
Instantaneous visual digital display of of heart rate. Harry Schellberg, 14
Equipment, see new equipment and new products
Etiology of cervical spondylosis, see genesis of cervical spondylosis
Evidence for Connections of the Sarcoplasmic Reticulum with the Sarcolemma and with the Z line in Skeletal Muscle Fibers of Fetal and Newborn Rats. Sheppard M. Walker, G. Randolph Schrodt, and Maxine Bingham, 63
Exercise, skeletal muscle hypertrophy after heavy , in rats with surgically reduced muscle function. W. Reitsma, 237
Extremity, see upper limb

F

Feedback, characteristics of head motion with variable visual , delay, velocity and displacement. Karl U. Smith, and Durgo S. V. Ramana, 289
Fetal and newborn rats, evidence for connections of the sarcoplasmic reticulum with the sarcolemma and with the Z line in skeletal muscle fibers of , . Sheppard M. Walker, G. Randolph Schrodt, and Maxine Bingham, 63
Fibers, see muscle fibers
see nerve fibers
Fifth International Congress of Physical Medicine. Special Report. Sidney Licht, 55
Filament Lengths and Distribution of Staining Material in the I Bands of Rat Skeletal Muscle. Sheppard M. Walker, and G. Randolph Schrodt, 178
Forces, a survey of the time, magnitude and orientation of , applied to walking sticks by disabled men. M. P. Murray, A. H. Seireg, and R. C. Scholz, 1
Functional anatomy, recent advances in the , of the upper limb. John V. Basmajian, 165
Function, see motor function
see muscle
Fusimotor system, influence of the , on stance and volitional movement in normal man. Georgia M. Shambes, 225

G

Genesis of cervical spondylosis, repetitive trauma in the , . D. R. Rellan, A. Bhatacharya, A. N. Mehrotra, N. C. Gupta, and P. C. Dhanda, 259
Guide to wheelchair prescription, see wheelchair

H

Handicapped, effectiveness of the automatic toothbrush for , persons. Robert Aronovitz, and Charles W. Conroy, 193
see disabled men
Head motion, characteristics of , with variable visual feedback delay, velocity and displacement. Karl U. Smith, and Durgo S. V. Ramana, 289
Heart rate, instantaneous visual digital display of , . Harry Schellberg, 14
Heavy exercise, skeletal muscle hypertrophy after , in rats with surgically reduced muscle function. W. Reitsma, 237
Hemidiaphragmatic paralysis, effect of quadriplegia and , on thoraco-abdominal pressure during respiration. Harold Keltz, Saul Kaplan, and Daniel J. Stone, 109
Hemiplegia, see unilateral infarction of the basis pontis
Hypertrophy, skeletal muscle , after heavy exercise in rats with surgically reduced muscle function. W. Reitsma, 237

I

I bands, filament lengths and distribution of staining material in the , of rat skeletal muscle. Sheppard M. Walker, and G. Randolph Schrodt, 178
Infarction, see unilateral infarction of the basis pontis
Influence of the Fusimotor System on Stance and Volitional Movement in Normal Man. Georgia M. Shambes, 225

Instantaneous Visual Digital Display of Heart Rate. Harry Schellberg, 14
International congress, see fifth international congress
Ions, electro-aerosols, air , and physical medicine. Special review. Alfred P. Wehner, 119

L

Lengths, see filament lengths
Limb, see upper limb
Line, see Z line

M

Magnitude, a survey of the time, , and orientation of forces applied to walking sticks by disabled men. M. P. Murray, A. H. Seireg, and R. C. Scholz, 1
Man, see disabled men
see handicapped
see normal adults
see normal man
Material, see staining material
Medicine, see physical medicine
Mobility, the wheelchair as a permanent mode of , . A detailed guide to prescription. Special review, part II. John H. Spiegler, and Melvin J. Goldberg, 25
Motion, see head motion
Motor function, recovery of , after unilateral infarction of the basis pontis. Report of a case. Mary Jane Aguilar, 279
Motor system, see fusimotor system
Movement, see volitional movement
Muscle fibers, evidence for connections of the sarcoplasmic reticulum with the sarcolemma and with the Z line in skeletal , of fetal and newborn rats. Sheppard M. Walker, G. Randolph Schrodt, and Maxine Bingham, 63
Muscle, filament lengths and distribution of staining material in the I bands of rat skeletal , . Sheppard M. Walker, and G. Randolph Schrodt, 178
see fusimotor system
see motor function
see pre-orthotic training
see volitional movement
skeletal , hypertrophy after heavy exercise in rats with surgically reduced muscle function. W. Reitsma, 237

N

Nerve fibers, sensory conduction of digital , . Osvaldo E. Miglietta, 78
Newborn rats, see fetal and newborn rats
New electronic designs, see electronic designs
New Equipment and New Products, 46, 92, 150, 206, 313
Computers, 49, 98, 156, 215
Diagnostic equipment, 47, 93, 151, 208, 315
Drugs and surgical equipment and supplies, 100, 321
Electromedical equipment, 46, 92, 150, 206, 313
General laboratory equipment, 48, 97, 154, 212, 318
Miscellaneous equipment, 49, 101, 158, 218, 321
Optical equipment and microscopes, 99, 157, 217, 321
Rehabilitation equipment, 47, 95, 153, 210, 316
New products, see new equipment and new products
News Notes, 52, 103, 160, 219, 274, 323
Normal adults, pre-orthotic training. An electromyographic study in , . T. G. Simard, and H. W. Ladd, 301
Normal man, influence of the fusimotor system on stance and volitional movement in , . Georgia M. Shambes, 225
Notes, see news notes
Notices, see book notices

O

Orientation, a survey of the time, magnitude and , of forces applied to walking sticks by disabled men. M. P. Murray, A. H Seireg, and R. C. Scholz, 1
Orthotic, see pre-orthotic training

P

Paralysis, see hemidiaphragmatic paralysis
Permanent mode of mobility, the wheelchair as a , . A detailed guide to prescription. Special review, part II. John H. Spiegler, and Melvin J. Goldberg, 25
Physical medicine, electro-aerosols, air ions and , . Special review. Alfred P. Wehner, 119
the fifth international congress of , . Special report. Sydney Licht, 55

Pons cerebri, see basis pontis
Pre-Orthotic Training. An Electromyographic Study in Normal Adults. T. G. Simard, and H. W. Ladd, 301
Prescription of the wheelchair, see wheelchair
Pressure, see thoraco-abdominal pressure
Products, see new equipment and new products

Q

Quadriplegia, effect of , and hemidiaphragmatic paralysis on thoraco-abdominal pressure during respiration. Harold Keltz, Saul Kaplan, and Daniel J. Stone, 109

R

Rapid volitional movement, electromyographic analysis of a , . Mario Wiesendanger, Peter Schneider, and Jean-Pierre Villoz, 17
Rate, see heart rate
Rat, filament lengths and distribution of staining material in the I bands of , skeletal muscle. Sheppard M. Walker, and G. Randolph Schrodt, 178
Rats, evidence for connections of the sarcoplasmic reticulum with the sarcolemma and with the Z line in skeletal muscle fibers of fetal and newborn , . Sheppard M. Walker, G. Randolph Schrodt, and Maxine Bingham, 63
skeletal muscle hypertrophy after heavy exercise in , with surgically reduced muscle function. W. Reitsma, 237
Recent Advances in the Functional Anatomy of the Upper Limb. John V. Basmajian, 165
Recovery of Motor Function after Unilateral Infarction of the Basis Pontis. Report of a Case. Mary Jane Aguilar, 279
Reduced muscle function, see surgically reduced muscle function
Rehabilitation, see automatic toothbrush
see case report
see cervical spondylosis
see electro-aerosols
see heavy exercise
see physical medicine
see pre-orthotic training
see quadriplegia
see walking sticks
see wheelchair
Repetitive Trauma in the Genesis of Cervical Spondylosis. D. R. Rellan, A. Bhatacharya, A. N. Mehrotra, N. C. Gupta, and P. C. Dhanda, 259
Report, see case report
see special report
Respiration, effect of quadriplegia and hemidiaphragmatic paralysis on thoraco-abdominal pressure during , . Harold Keltz, Saul Kaplan, and Daniel J. Stone, 109
Reticulum, evidence for connections of the sarcoplasmic , with the sarcolemma and with the Z line in skeletal muscle fibers of fetal and newborn rats. Sheppard M. Walker, G. Randolph Schrodt, and Maxine Bingham, 63
Reviews, see special reviews

S

Sarcolemma, evidence for connections of the sarcoplasmic reticulum with the , and with the Z line in skeletal muscle fibers of fetal and newborn rats. Sheppard M. Walker, G. Randolph Schrodt, and Maxine Bingham, 63
Sarcoplasmic reticulum, see reticulum
Sensory Conduction of Digital Nerve Fibers. Osvaldo E. Miglietta, 78
Signals, see electromyographic signals
Skeletal muscle fibers, see muscle fibers
Skeletal Muscle Hypertrophy after Heavy Exercise in Rats with Surgically Reduced Muscle Function. W. Reitsma, 237
Skeletal muscle, see muscle
Special Report, 55
The fifth internation congress of physical medicine. Sidney Licht, 55
Special Reviews, 25, 119
Electro-aerosols, air ions and physical medicine. Alfred P. Wehner, 119
The wheelchair as a permanent mode of mobility. A detailed guide to prescription. Part II. John H. Spiegler, and Melvin J. Goldberg, 25
Spondylosis, see cervical spondylosis
Staining material, filament lengths and distribution of , in the I bands of rat skeletal muscle. Sheppard M. Walker, and G. Randolph Schrodt, 178
Stance, influence of the fusimotor system

on , and volitional movement in normal man. Georgia M. Shambes, 225
Sticks, see walking sticks
Stroke, see unilateral infarction of the basis pontis
Study, see electromyographic study
Surgically reduced muscle function, skeletal muscle hypertrophy after heavy exercise in rats with , . W. Reitsma, 237
Survey of the Time, Magnitude and Orientation of Forces Applied to Walking Sticks by Disabled Men. M. P. Murray, A. H. Seireg, and R. C. Scholz, 1
System, see fusimotor system

T

Thoraco-abdominal pressure, effect of quadriplegia and hemidiaphragmatic paralysis on , during respiration. Harold Keltz, Saul Kaplan, and Daniel J, Stone, 109
Time, a survey of the , , magnitude and orientation of forces applied to walking sticks by disabled men. M. P. Murray, A. H. Seireg, and R. C. Scholz, 1
Toothbrush, see automatic toothbrush
Training, pre-orthotic , . An electromyographic study in normal adults. T. G. Simard, and H. W. Ladd, 301
Trauma, repetitive , in the genesis of cervical spondylosis. D. R. Rellan, A. Bhatacharya, A. N. Mehrotra, N. C Gupta, and P. C. Dhanda, 259

U

Unilateral infarction of the basis pontis, recovery of motor function after , . Report of a case. Mary Jane Aguilar, 279
Upper limb, recent advances in the functional anatomy of the , . John V. Basmajian, 165

V

Variable visual feedback, see feedback
Velocity, see feedback
Visual digital display, see instantaneous visual digital display
Visual feedback, see feedback
Volitional movement, electromyographic analysis of a rapid , . Mario Wiesendanger, Peter Schneider, and Jean-Pierre Villoz, 17
influence of the fusimotor system on stance and , in normal man. Georgia M. Shambes, 225

W

Walking sticks, a survey of the time, magnitude and orientation of forces applied to , by disabled men. M. P. Murray, A. H. Seireg, and R. C. Scholz, 1
Wheelchair as a Permanent Mode of Mobility. A Detailed Guide to Prescription. Special Review, Part II. John H. Spiegler, and Melvin J. Goldberg, 25

Z

Z line, evidence for connections of the sarcoplasmic reticulum with the sarcolemma and with the , in skeletal muscle fibers of fetal and newborn rats. Sheppard M. Walker, G. Randolph Schrodt, and Maxine Bingham, 63

CONTENTS

NUMBER 1, FEBRUARY 1969

A Survey of the Time, Magnitude and Orientation of Forces Applied to Walking Sticks by Disabled Men. M. P. Murray, Ph.D., A. H. Seireg, Ph.D., and R. C. Scholz, M.Sc 1
Instantaneous Visual Digital Display of Heart Rate. Harry Schellberg 14
Electromyographic Analysis of a Rapid Volitional Movement. Mario Wiesendanger, M.D., Peter Schneider, and Jean-Pierre Villoz 17
Special Review. The Wheelchair as a Permanent Mode of Mobility. A Detailed Guide to Prescription. Part II. Upholstery, Leg Supports, Wheels and Accessories. John H. Spiegler, M.D., and Melvin J. Goldberg, M.D. 25
Book Notices 38
New Equipment and New Products 46
News Notes 52

NUMBER 2, APRIL 1969

Special Report. The Fifth International Congress of Physical Medicine. Sidney Licht, M.D. 55
Evidence for Connections of the Sarcoplasmic Reticulum with the Sarcolemma and with the Z line in Skeletal Muscle Fibers of Fetal and Newborn Rats. Sheppard M. Walker, Ph.D., G. Randolph Schrodt, M.D., and Maxine Bingham, M.S. 63
Sensory Conduction of Digital Nerve Fibers. Osvaldo E. Miglietta, M.D. 78
Book Notices 85
New Equipment and New Products 92
News Notes 103

NUMBER 3, JUNE 1969

Effect of Quadriplegia and Hemidiaphragmatic Paralysis on Thoraco-Abdominal Pressure during Respiration. Harold Keltz, M.D., Saul Kaplan, M.D., and Daniel J. Stone, M.D. 109
Amplifier for Electromyographic Signals. Raymond L. Ball 116
Special Review. Electro-Aerosols, Air Ions and Physical Medicine. Alfred P. Wehner, D.M.D. 119
New Equipment and New Products 150
News Notes 160

NUMBER 4, AUGUST 1969

Recent Advances in the Functional Anatomy of the Upper Limb. John V. Basmajian, M.D. 165
Filament Lengths and Distribution of Staining Material in the I Bands of Rat Skeletal muscle. Sheppard M. Walker, Ph.D., and G. Randolph Schrodt, M.D. 178
Effectiveness of the Automatic Toothbrush for Handicapped Persons. Robert Aronovitz, D.D.S., M.Sc., and Charles W. Conroy, D.D.S., M.Sc. 193
New Equipment and New Products 206
News Notes 219

NUMBER 5, OCTOBER 1969

Influence of the Fusimotor System on Stance and Volitional Movement in Normal Man. Georgia M. Shambes, Ph.D. 225

Skeletal Muscle Hypertrophy after Heavy Exercise in Rats with Surgically Reduced Muscle Function. W. Reitsma, M.D., Ph.D. 237
Repetitive Trauma in the Genesis of Cervical Spondylosis. D. R. Rellan, M.R.C.P. (London), A. Bhatacharya, M.D. (Delhi), A. N. Mehrotra, M.D. (Luck), M.R.C.P. (Edin), N. C. Gupta, D.M.R.E. (Gwalior), and P. C. Dhanda, F.R.C.P. (London) .. 259
Book Notices 264
News Notes 274

NUMBER 6, DECEMBER 1969

Recovery of Motor Function after Unilateral Infarction of the Basis Pontis. Report of a Case. Mary Jane Aguilar, M.D. 279
Characteristics of Head Motion with Variable Visual Feedback Delay, Velocity and Displacement. Karl U. Smith, Ph.D., and Durgo S. V. Ramana, M. A. 289
Pre-Orthotic Training. An Electromyographic Study in Normal Adults. T. G. Simard, Ph.D., and H. W. Ladd, Ph.D. 301
New Equipment and New Products 313
News Notes 323
Subject Index 327
Author Index 332
